

Mechanical drawing Prepared for the use of the students of the Massachusetts Institute of Technology, Boston, Mass

Filesize: 7.11 MB

Reviews

Comprehensive manual for ebook fans. I am quite late in start reading this one, but better then never. Its been written in an exceptionally basic way and is particularly merely soon after i finished reading this publication in which really changed me, affect the way in my opinion.
(Prof. Antone Olson II)

MECHANICAL DRAWING PREPARED FOR THE USE OF THE STUDENTS OF THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY, BOSTON, MASS

To download **Mechanical drawing Prepared for the use of the students of the Massachusetts Institute of Technology, Boston, Mass** PDF, you should access the web link listed below and save the document or have accessibility to other information that are have conjunction with MECHANICAL DRAWING PREPARED FOR THE USE OF THE STUDENTS OF THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY, BOSTON, MASS book.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 36 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1887 Excerpt: . . . will all be of the same size. 54. Prob. 3. To draw the two projections of a plane surface, or card, of a certain size, and making a compound angle with the coordinate planes. Let the card be of the size shown in Fig. 9, and suppose it to make an angle of 30 with H, and its horizontal projection an angle of 45 with GL. Draw the horizontal projection ahbhchdh of the card equal to its true size; avbv will be its vertical projection. Revolve avbv through an angle of 30 to avbf, and avbyv will be the vertical projection of the card when it makes an angle of 30 with H and is perpendicular to V; ahb hc hdh is its corresponding horizontal projection. The angle with H is still to be 30 after the card has been revolved to its desired position, hence its horizontal projection will be the same size. Therefore, make ahbihcihdh, Fig. 10, equal in size to ahbjlcihdh, Fig. 9, and making the desired angle with GL. In this revolution, as long as one edge rests on H and the angle remains constant with H, every point keeps the same height above H, therefore the vertical projections of ah and d Fig. 10, must be found at av and dv; also of b and c h at iv and cv, whose heights above GL are equal to the height of b Fig. 9, above GL. The other parallelograms in Fig....
